1

## WHAT IS CLAIMED IS:

2	1. A clock (10) with a luminous decoration member (20) provided thereon, the
3	clock (10) having a housing (11) and a dial (12) with clock hands (13) moving thereon,
4	wherein
5	the luminous decoration member (20) is formed in an annular shape and fixedly
6	mounted on a front side of the dial (12);
7	a layer of fluorescent material (21) is applied on a rear side of the luminous
8	decoration member (20); and
9	multiple lightings (30) are respectively fitted in equal-spaced multiple recesses (22)
10	defined around the luminous decoration member (20).
11	2. The clock (10) as claimed in claim 1, wherein the multiple lightings (30) are
12	light-emitting diodes, each one of which has two terminal pins (31) electrically connected
13	to terminals of a power supply provided in the housing (11).
14	3. The clock (10) as claimed in claim 1, wherein the luminous decoration member
15	(20) is made of a transparent material.
16	4. The clock (10) as claimed in claim 1, wherein the luminous decoration member
17	(20) is formed with multiple equal-spaced positioning posts (24) corresponding to multiple

- equal-spaced positioning holes (14), whereby the luminous decoration member (20) is

  fixedly mounted on the dial (12) by means of positioning posts (24) respectively fixed into

  the positioning holes (14).

  The clock (10) as claimed in claim 1, wherein multiple fasteners (26) are
  - respectively threaded into internal threads (25) defined in the multiple positioning posts (24).
